---

### **Professional Summary**

Highly motivated Business Computing student with a strong foundation in software engineering, computational thinking, and Artificial Intelligence. Passionate about building secure, high-performance, and scalable systems. Proficient in multiple programming paradigms — from high-level languages (Python, Java) to systems programming (Rust, C++). Experienced in machine learning pipelines, Linux system administration, and blockchain development. Demonstrated ability to balance rigorous academics with competitive athletics while pursuing self-directed learning in emerging technologies. Seeking admission to the Bachelor of Science in Computer Science and Artificial Intelligence at Neapolis University Pafos to advance expertise in intelligent systems.

### **Education**

**Jomo Kenyatta University of Agriculture and Technology (JKUAT), Juja, Kenya**  
**Bachelor of Science in Business Computing** *Expected Graduation: 2028*

**Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (SQL), Software Engineering Principles, Network Security.

### **Activities:**

- Competitive Swimmer, JKUAT University Swimming Team
- Member, UNESCO Student Organization

**Moringa School, Nairobi, Kenya Professional Certificate in Artificial Intelligence**  
— 2025 Core focus: Machine learning pipelines, data preprocessing, model evaluation, and cloud deployment.

### **Technical Skills**

- **Programming Languages:** Python, Rust, C++, Java, JavaScript, SQL, HTML/CSS
- **AI and Machine Learning:** Scikit-Learn, Pandas, Predictive Modeling, Data Preprocessing
- **Systems & Security:** Linux Administration, Kali Linux, Network Troubleshooting, Dual-Boot Architecture, Secure System Configuration
- **Emerging Technologies:** Blockchain Architecture, Smart Contracts (Rust), Decentralized Applications (dApps)

- **Tools:** Git/GitHub

## **Technical Projects**

- **Smart Contract & Decentralized Application Development (Rust)** Developed and audited secure smart contracts using Rust with emphasis on cryptographic safety, memory efficiency, and immutable architecture. Maintained high-quality code through Git version control.
- **Systems Security & Infrastructure Optimization** Designed and configured a permanent dual-boot Kali Linux environment for advanced systems learning. Performed security audits, network penetration testing, and system hardening to gain deep understanding of secure system design and troubleshooting.
- **ITACA Program for Artificial Intelligence – Certification** Completed intensive, industry-aligned AI program focused on building, testing, and deploying intelligent systems in production-like environments under tight deadlines.

## **Leadership & Extra-curricular Experience**

- **JKUAT University Swimming Team – Student Athlete & Mentor** Balance demanding academic schedule with daily competitive training. Mentor and coach new team members, focusing on skill development and water safety.
- **UNESCO Student Organization – Active Member** Participate in cross-cultural initiatives and community projects that promote technology education for sustainable development.
